

# ALWAYS ON FOR PUBLIC SAFETY & GOVERNMENT

Ensure **ALWAYS-ON AVAILABILITY** of your emergency response systems to protect lives and property

Public Safety Answering Points (PSAPs) and first responders rely on sophisticated technology to protect lives and property. So when it comes to your Computer-Aided Dispatch (CAD), Records Management Systems (RMS), Geographic Information Systems (GIS), Next-Generation 9-1-1 (NG9-1-1) systems and mobile communications, there's no time for downtime.

It takes more than just recovering as fast as possible after a failure has occurred. When lives are on the line, you need to detect and prevent failures before they happen. That's exactly what Stratus Technologies does for you.

Stratus keeps all your applications up and running 24/7/365, enabling you to respond without fail. We offer a range of flexible always-on solutions that are easy to deploy and manage, and backed by a support structure with a 30-year track record of success.

Our solutions can be rapidly deployed in your chosen environment — physical, virtualized or cloud — without any changes to your applications.

“We have found everRun to be the piece in our data center that was missing. With everRun, we are confident that our police, fire and EMS teams have continuous access to the applications they need to respond to emergencies.”

**Officer Scott Wilder**  
Brookline Police Department

## Key Benefits

- Ensure 24/7/365 availability of emergency response systems and applications
- Detect potential problems and proactively take action before downtime becomes an issue
- Scale easily to accommodate changing business requirements
- Meet business continuity goals for data integrity and reliability
- Leverage 24/7/365 global support

**Software Solutions**

Reliable and flexible availability software with built-in virtualization

Supports Windows® and Linux® environments deployed on industry-standard servers

Supports split-site deployment for disaster recovery

**Platform Solutions**

All-inclusive end-to-end solution provides worry free operations with integrated hardware, software and service

Intel® Xeon-based servers running Windows®, Linux®, VMware® and OpenVOS environments

Maximum application uptime and performance

**Services**

24/7/365 monitoring and proactive problem resolution

Expert professional services to define and manage an availability strategy

Certified best practices using performance management tools with predictive analytics

**Learn how Stratus can keep your emergency response systems always on**

For 30 years, organizations around the world — from Global Fortune 500 companies to small and medium-sized businesses — have relied on Stratus to keep their operations running around the clock. Get all the details at [www.stratus.com/safety](http://www.stratus.com/safety). You'll see how other PSAPs and emergency response teams around the world ensure availability of their critical public safety systems with Stratus always-on solutions—and how you can, too.

**About Stratus**

Stratus Technologies is the leading provider of infrastructure based solutions that keep applications running continuously in today's always-on world. Stratus enables rapid deployment of always-on infrastructures, from enterprise servers to clouds, without any changes to applications. Stratus' flexible solutions — software, platform and services — prevent downtime before it occurs and ensure uninterrupted performance of essential business operations.

**Stratus' Always-On Solutions Solve Our Customers' Biggest Needs****Flexible**

Our solutions support a range of environments — physical, virtualized or cloud — for emergency response systems and applications.

**Easy**

Our products are easy to deploy and manage, and require no modifications to CAD, RMS, GIS or NG9-1-1 applications.

**Trusted**

PSAPs around the globe rely on Stratus to keep their emergency response systems up and running.
