

# ALWAYS ON FOR TELECOMMUNICATIONS & MEDIA

Achieve **ROUND-THE-CLOCK APPLICATION AVAILABILITY** to maximize revenue opportunities and reduce churn

With communications such an integral part of everyday life — at work, at home and on the go — network operators and service providers must ensure 24/7/365 availability of core systems, including traditional converged circuit and packet networks, as well as GSM, TDMA and CDMA networks. Even momentary outages can be extremely costly in terms of both lost revenue and customer churn.

There's no reason to put your business at risk. Let Stratus Technologies keep your network services and business applications up and running all the time. With our comprehensive portfolio of software and platform solutions and round-the-clock monitoring services, it's no wonder that some of the top telecom providers put their trust in Stratus. We offer a range of flexible always-on solutions that are easy to deploy and manage, and backed by a support structure with a 30-year track record of success.

Our solutions can be rapidly deployed in your chosen environment — physical, virtualized or cloud — without any changes to your applications.

## Key Benefits

- Protect your most critical applications with an always-on operating environment
- Detect potential problems and proactively take action before downtime becomes an issue
- Scale easily to support future development and network growth
- Reduce operational costs and churn
- Meet compliance requirements for data integrity and reliability
- Leverage 24/7/365 global support

“The Stratus solution works and it includes 24/7/365 monitoring. As an operations director, I don't have sleepless nights.”

**Robert Bos**  
Regional Operations Director  
Sam Media Ltd.
